### **DETAILED ACTION**

- Applicant's Pre-Brief request filed 7/1/2008 is acknowledged.
- Prosecution has been re-opened according to the Pre-Brief decision mailed 9/17/2008.
- Claims 1-3, 5-8, 10-13, 15-19, 21, 22, and 24 are pending.

### ***Allowable Subject Matter***

1. Claims 1-3, 5-8, 10-13, 15-19, 21, 22, and 24 are allowed.

- Regarding claims 1, 11, 18, and 24,

The prior art of record does not teach or fairly suggest a method, terminal, system, or a computer-readable medium storing an executable computer program code section that transmits a message comprising a command to reset an application level time-out counter in the application server for maintaining an interrupted data transmission connection before starting to establish a circuit-switched telecommunications connection.

The closest prior art, US Patent 6,560,239 to Frid et al., discloses establishing a circuit-switched connection after interrupting a data connection. Frid also discloses re-establishing applications of the interrupted and maintained data connection after the time of the circuit-switched connection as long as the application have not timed-out.

However, Frid does not disclose or suggest preventing application time-out by resetting the application level time-out counter in the application server before starting to establish the circuit-switched connection, as presently claimed.

Therefore, claims 1, 11, 18 and 24 are allowable over the prior art. All other pending claims are allowable due to their dependence from claim 1, 11 or 18.
